Hospital Water Quality Monitoring Station

Water supply to Hospitals and Healthcare facilities are frequently an overlooked area, and yet essential for safe patient care. Numerous healthcare associated outbreaks have been linked to contaminated water, that is used for patient care departments as well as general handwashing and cleaning of medical devices.

Water, Sanitation and Hygiene (WASH) program from WHO has published guidelines for safe water by which all hospitals and healthcare facilities are evaluated.

Elico's AquaSense HWMS is a robust tool that can be used to monitor the required water quality parameters.

Simple to use –
One Touch Operation

Remote Data
Transfer 4G

Integrated 4G Modules
for remote data transfer and
storing the data on secure cloud
